

## CES INSTITUTE OF RELIGION

Educational & Classroom Building  
Gainesville, Florida

Contractor: Joseph N. Holton  
Construction Co. Inc

Completed: April 2001

### Design Aspects

- Traditional design with creative use of vertical space of existing site.
- Convince City officials new building with expanded parking could be designed/ built to meet restrictive zoning, building and water management criteria on a small inner city site
- Demolish existing building and Construct new one in less than one year.

### *Solving the Unsolvable:*

City Officials said “Be happy with what you have! Don’t rock the boat.” Creative problem solving and persistent appeals resulted in successful completion of this 7,888 sq ft Educational Building with 35 parking spaces on a ‘postage stamp’ .41 acre site.
